

2018/19 SBTC Triathlete of the Year (TOTY)

Awards:

- Male and Female
- Trophies for 1st, 2nd and 3rd

Based on these key criteria:

1. Achievement in all Triathlon Australia sanctioned Sprint (SP), Olympic/Standard (OS), 70.3/long course (LC) and Ironman (IM) races.
2. The points awarded towards TOTY will be based on the size of the event (your result with respect to the number of competitors in your category), and weighted by the distance of the event with four different categories - Sprint (SP), Olympic/Standard (OS), 70.3/long course (LC) and Ironman (IM).
3. Club contribution including attendance at training, volunteer contribution and wearing of club kit.
4. You must have completed the nominated distance as an individual - not as part of a team.
5. Your category must be the appropriate age group category - not a "mates wave" or similar.

Schedule of Events:

The full list of Triathlon Australia sanctioned Triathlons and Duathlons which meet the minimum Race Classifications as per below, are attached as an appendix to this document:

Race Classification:

Races will be classified by the race distances, into:

SP - Sprint distance (750/20/5)

OS - Standard Distance Triathlon (1,500/40/10), Duathlon (10/40/5)

LC - Long course (70.3s (1,900/90/21.1), Hervey Bay (2,000/80/18), Hell of the West (2,000/80/18)

IM - Ironman 140.6 (3,800/180/42.2)

Where a race distance is less than the standard race distances noted above, that event will be declassified to the lesser distance. For example: Raby Bay "long", comprising 900/25/6 distances, will be classified as SP, and the Raby Bay "Short" (400/15/4) will not be considered for TOTY.

Likewise, Bribie race 2 and 3 (1,000/30/8) will also be declassified to SP. The Bribie "short" option races will not be considered for TOTY.

Points System:

1. For each race, an athlete's score is the percent rank of their place in their age-group (ie someone coming 5th out of 20 would score 80 points for that event, someone finishing 12th out of 200 would score 94.5 points, finish 1st out of 7 would give 100 points whereas finishing 7th out of 7 would result in 14.3 points)

2. The following weighting is applied to each type of event:

SP - Sprint distance – the score is left unchanged

OS - Olympic/Standard distance – the score is multiplied by 2 for that event

LC - Long course (70.3s, Hervey Bay, Tweed) – the score is multiplied by 3 for that event

IM - Ironman 140.6 – the score is multiplied by 4 for that event

3. The athlete's total score is the highest combination of the sum of their scores that is "normalised" to a total score of 1000. This could be made up of (for example):

2 x LC (2 x 300) + 2 x OL (2 x 200); or

1 x IM (1 x 400) + 2 x LC (2 x 300); or

4 x SP (4 x 100) + 3 x OL (3 x 200) etc

4. If someone's best (or only) results overlapped the 1000 point normalisation (let's say with a score of 800 out of 1100), their worst result making up the score would be proportionally reduced (eg their worst result was scoring 100 of 200 for an OL, their final score would be 750).

Summary:

- As the distances are weighted, an athlete isn't disadvantaged by competing in fewer but longer events
- There is still weighting towards best results, rather than someone competing in all events scoring highest
- By using a percent rank, an athlete is fairly scored as a result of their position in their age-group
- (Subjective) key criteria 2. can still be applied to the raw results
